

# CHURCH DASHBOARD INTRODUCTION

The Church Dashboard is a web-based program that allows local churches within the Iowa Conference to update the information for their church both in the conference database and on our conference website. This includes items such as worship times, directions to the church, and even events being held in the church. This information then shows on the church detail page in the “Find a church” section of the website.

In addition, the dashboard gives churches the opportunity to add their leaders directly into the conference database, allowing the conference and district offices the ability to communicate directly with the leaders of the church.

It is our goal that every local church will use the dashboard so that the conference and district offices, as well as the general public through the conference website, can have access to the most up-to-date information regarding your church.

If you have questions regarding the church dashboard that are not answered in the user guide (link below), please contact Roland Minshall ([roland.minshall@iaumc.org](mailto:roland.minshall@iaumc.org)) in the conference office.
